Graphi

Installation Guide

To setup:

Make sure your Linux computer is connected to the Internet

Run the following commands in the terminal:

1. Run "bash setup.sh".

- When the installer prompts you to install Qt, follow the on-screen prompts.
- When the installer prompts you to install the AMD SDK, keep pressing Enter, until the User Agreement ends. Then press "y".

2. Run "Graphi"

Dependencies (automatically installed via setup.sh):

1. Qt 5.4.1

2. OpenCL(AMD-APP-SDK or Free OSDL)

3. Boost Library

4. libGSL

5. libFreeType
